

# **Sprint 4 - Quick Meetings**

## **Group 11**

### **1 Scrum Meeting 4.1 2022/06/02 17:00**

#### **Summary:**

A meeting was held to discuss the progress each member made with their assigned issues. The issues regarding the database connection was the main focus.

#### **Task Assignment:**

Not a specific assignment was changed, explained the workings of database connection issues that are closed / going to be closed.

### **2 Scrum Meeting 4.2 2022/06/03 13:00**

#### **Summary:**

A meeting was held to discuss the changes to testing frameworks, using Jest and Puppeteer as opposed to Selenium alone.

#### **Task Assignment:**

No task assignment was changed.

### **3 Scrum Meeting 4.3 2022/06/06 13:00**

#### **Summary:**

Scoring system was discussed and prepped for database usage. By using the Puppeteer framework, the daily quota of requests to Azure was exceeded. It was decided to create a separate web application to implement the Puppeteer framework.

#### **Task Assignment:**

Robin implemented the scoring database. Van Niekerk and Tristan Basel was assigned to creating an application to implement the Puppeteer framework
