Sprint 0 - Daily Scrum Meeting Minutes

Group 11

1. Scrum meeting 1.1 2022/05/03 at 12:30

Summary:

The purpose of sprint 0 is to gain an understanding of scrum as well as the tools necessary for web development. All preparatory labs are to be completed by the team so that when sprint 1 begins we can begin working effectively with fewer mistakes and obstacles. The user stories for sprint 1 were placed into the current GitHub project in order to familiarise ourselves with agile coding however the tasks will only be completed within sprint 1 starting on the 10th of May 2022.

Backlog updates:

- Issues #1 through to #26 were created to familiarise the team with GitHub project,
- Issue # 12 title and point assignment was edited.

Task assignments:

Everyone was assigned to familiarise themselves with the scrum workflow, the GitHub project environment and any outstanding lab exercises.

Current sprint progress:

- Researched scrum framework.
- Created starting work backlog.
- Set up repository
- Initial commits
- Create user stories(issues)
- Assigned user-stores for sprint 1 and agreed on point allocation.

Current sprint focus:

- For everyone the sprint focus of this week was to complete relevant labs and do research in order to complete the tasks assigned to each member.

Impediments that may prevent the development team from meeting the Sprint Goal:

- None, as this sprint was a preparatory sprint with the focus being only on learning and familiarization.
